EDUCATION

B.Sc. Faculty of Computers and Artificial Intelligence

Sep 2025 – Jun 2029

Capital University (formerly Helwan University)

GPA: 3.43

Grade: Excellent

SKILLS

Core Skills: Problem Solving, Analytical Thinking, OOP

Programming Languages: Python, C, C++, Java, PHP

Data & ML Tools: NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook

Front-End: HTML, CSS, Javascript

Version Control: Git & GitHub

PROJECTS

Istabraq 🔗

03/2026 – Present

Airlines Booking website

- Worked with a team to Build and develop a frontend for a booking website
- Implemented GitHub Pages deployment easily with a link
- Made a working search system in a database mimic (array of ticket objects)
- Used jQuery to make the development process easier

Student Portal API 🔗

07/2026 – Present

- Developed a **REST-style Student Management API** in PHP supporting CRUD operations, search, and filtering, with JSON responses for client-server communication.
- Implemented **persistent data storage** using JSON files, including dynamic creation, updating, and deletion of student records without a database.
- Designed and validated API endpoints with appropriate **HTTP methods, server-side input validation, and error handling** to ensure reliable request processing.
- Structured the application into reusable components and helper functions, improving **code organization, maintainability, and separation of responsibilities**.
- Built features for retrieving students by **ID, department, name, and GPA**, demonstrating practical API design and backend data processing.
